11 - General Data Format

11.1 - Form Structure

With one exception, the forms for reporting the accomplishments of State and Private Forestry programs are designed to facilitate both hand compilation and keypunching for automatic data processing. The exception, Form FS-3200-6, Cooperative Forestry Accomplishment Report, is designed for hand compilation only.

11.2 - Form Identifiers

The general data format provides for up to seven identifiers for each report. They are as follow:

1. Forest Service Region or Area.
2. State.
3. Organization structure code. (Use this identifier on Form FS-3400-5, Forest Insect and Disease Management Accomplishment Report, only.)
4. Fiscal year or calendar year.
5. Program.
6. Project. (This includes Rural Conservation and Development project areas and insect and disease identification numbers as well as flood prevention and small watershed projects.)
7. Source of report.

Chapter 20 includes specific instructions for each report.

12 - Identifier Codes and Definitions

States shall identify the State, fiscal or calendar year, program, project, and source of report. Forest Service Regional and Area program personnel shall complete data processing code blocks according to the definitions that follow. No data processing codes are necessary on Form FS-3200-6, Cooperative Forestry Accomplishment Report. Use abbreviations for Region/Area, State, and fiscal year on that report.

12.1 - Explanation of Identifier Entries and Codes

An explanation of the identifier entries and codes follows.

1. Area or Region. (Field 1-2). The Forest Service Area or Region that receives the form. The Forest Service shall complete this information.

Code	Source
1	State forestry agency
2	Other State agency
3	Forest Service
4	Other Federal agency

13 - Error Controls

The system includes several provisions for error control.

13.1 - Editing by Hand

State and Private Forestry program personnel shall code identifiers on forms submitted by the States and review the forms for obvious errors.

13.2 - Editing by Computer

A computer routinely checks all identifier coding for validity and uses the check totals entered on the forms to edit accomplishment entries. This applies only to Form FS-3400-5, Forest Insect and Disease Management Accomplishment Report.

13.3 - Error Correction

The organization submitting the form shall correct all errors or apparent discrepancies.

14 - Activities, Assists, and Accomplishments to be Reported

14.1 - Activity

An activity is a specific action provided within the limits of the State and Private Forestry cooperative program(s) in response to a landowner or other cooperator request. This includes forest insect and disease management activities on National Forest and other Federal lands. Each program included in this reporting system lists those activities for which there must be accomplishment data.

14.2 - Assist

An assist is technical advice or assistance to a landowner, logger, or processor for a specific prescribed action. Record an assist for each activity. For example, if timber stand improvement advice or assistance is modified to protect or improve wildlife habitat and outdoor recreation, record one assist for each of the three activities.

14.3 - Accomplishment

Accomplishment is a measure of the on-the-ground result of an assist expressed in acres, cubic feet, and so forth. With one exception, report accomplishments as they occur. This exception is part III, Improved Utilization of Wood, on Form FS-3200-6, Cooperative Forestry Accomplishment Report (sec. 21.33).

Information concerning on-the-ground accomplishments is essential for measurement of program effectiveness. This may require contacts as much as a year or so after the assist to determine actual accomplishments. Do not record as accomplishments the results of actions contrary to advice given.
