DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND
RELATED AGENCIES APPROPRIATIONS BILL, 2017

JUNE 16, 2016.—Ordered to be printed

Ms. Murkowski, from the Committee on Appropriations,
submitted the following

REPORT

[To accompany S. 3068]

The Committee on Appropriations reports the bill (S. 3068) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2017, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Total obligatory authority, fiscal year 2017

Total of bill as reported to the Senate $32,762,011,000
Amount of 2016 appropriations $32,925,579,000
Amount of 2017 budget estimate $33,176,164,000
Bill as recommended to Senate compared to—
2016 appropriations $-163,568,000
2017 budget estimate $-414,153,000
CONTENTS

Summary of Bill ........................................................................................................... 4
Major Changes Recommended in the Bill ................................................................. 4
Reprogramming Guidelines ....................................................................................... 10

Title I: Department of the Interior:
Land and Water Resources: Bureau of Land Management ............................ 12
Fish and Wildlife and Parks:
U.S. Fish and Wildlife Service .............................................................................. 21
National Park Service .............................................................................................. 29
Energy and Minerals:
U.S. Geological Survey .......................................................................................... 35
Bureau of Ocean Energy Management ................................................................. 39
Bureau of Safety and Environmental Enforcement ............................................ 41
Office of Surface Mining Reclamation and Enforcement .............................. 42
Indian Affairs: Bureau of Indian Affairs and Bureau of Indian Education .... 44

Departmental Offices:
Office of the Secretary ........................................................................................... 51
Insular Affairs ......................................................................................................... 53
Office of the Solicitor .............................................................................................. 54
Office of Inspector General .................................................................................... 54
Office of Special Trustee for American Indians ............................................... 55

Department-wide Programs:
Wildland Fire Management .................................................................................... 55
Central Hazardous Materials Fund ....................................................................... 56
Natural Resource Damage Assessment and Restoration ............................... 56
Working Capital Fund .............................................................................................. 56
Payments in Lieu of Taxes ....................................................................................... 56

General Provisions: Department of the Interior ............................................... 57

Title II: Environmental Protection Agency:
Program Description ............................................................................................... 50
Science and Technology ......................................................................................... 61
Environmental Programs and Management ......................................................... 64
Office of Inspector General ................................................................................... 73
Buildings and Facilities .......................................................................................... 73
Hazardous Substance Superfund ......................................................................... 73
Leaking Underground Storage Tank Trust Fund .................................................. 75
Inland Oil Spill Program .......................................................................................... 76
State and Tribal Assistance Grants ....................................................................... 76
Water Infrastructure Finance and Innovation Program .................................... 77

Administrative Provisions ...................................................................................... 77

Title III: Related Agencies:
Department of Agriculture: Forest Service ......................................................... 78
Administrative Provisions ....................................................................................... 88
Department of Health and Human Services:
Indian Health Service ............................................................................................ 88
Contract Support Costs ........................................................................................... 89
National Institutes of Health .................................................................................. 91
Agency for Toxic Substances and Disease Registry .......................................... 99

Other Related Agencies:
Executive Office of the President ........................................................................ 92
Council on Environmental Quality and Office of Environmental Quality .... 92
technology development, creating new and expanded markets for wood products to help ensure forests are healthy, sustainable and more resilient to disturbances. Additionally, the Committee directs the Forest Products Laboratory to collaborate with University partners to advance cost-effective biomass uses.

_Ceratocystis Disease._—The Committee notes the Forest Service's report “Risk and pathway assessment for the introduction of exotic insects and pathogens that could affect Hawai‘i’s native forests” and directs the Forest Service to work with the Fish and Wildlife Service, the National Park Service, the USDA Animal and Plant Health Inspection Service, and the States of Hawai‘i and Florida to develop recommended actions based on the findings of the report to respond to the emergence of Ceratocystis disease in Hawai‘i and Florida.

Within the Research and Development program, the Committee recognizes the Water, Air & Soil Program's potential to advance environmental monitoring technologies and methods. The Committee urges the Forest Service to advance partnerships between this program and other Federal agencies to explore alternative and innovative testing systems for toxins, pollutants, and other environmental contaminants such as analyzing moss to detect heavy metal deposition.

**STATE AND PRIVATE FORESTY**

</table>

The bill provides a total appropriation of $220,831,000 for State and private forestry programs, a decrease of $16,192,000 below the enacted level. Program changes to the enacted level are detailed in the following budget activity narratives and funding levels for each subactivity can also be found in the table at the end of this report.

**Landscape Scale Restoration [LSR].—**The bill provides an appropriation of $14,000,000 for landscape scale restoration, an amount equal to the enacted level. The Committee recommends that all funding allocated be awarded competitively to States for the purpose of conducting collaborative, science-based restoration of priority forest landscapes and managing forest resources that are at risk of catastrophic wildfire, invasive species, insect infestations and disease, and any other threats that degrade the vitality of forest ecosystems. The Committee believes LSR investments should be used exclusively for projects that are outcome driven to encourage active forest management on cross-boundary priority forest landscapes, to actively restore and protect forests from natural threats and wildfire, and to advance active forest management priorities identified in statewide forest assessment and resource strategies. Additionally, Committee urges the Forest Service to work with the Department of the Interior to increase cross-boundary collaboration through the Hazardous Fuels Program, particularly with State Foresters and private sector organizations, in efforts to reduce hazardous fuels in high fire risk landscapes and to prioritize projects that work across ownership boundaries in landscapes, particularly those areas identified as priorities in State Forest Action Plans. For greater transparency and accountability, the Secretary shall
provide to the Committee a report within 180 days on the status of development, execution, and administration of selected projects; accounting of program funding expenditures; and specific accomplishments that have resulted from landscape-scale restoration projects funded through this appropriation and projects funded since the inception of the LSR budget line item.

**Forest Health Management.**—The bill provides $32,060,000 for forest health management activities, an amount $7,540,000 below the enacted level. This includes $51,382,000 for activities on Federal lands and $40,678,000 on cooperative lands.

**Cooperative Forestry.**—The bill provides $98,474,000 for cooperative forestry activities, a decrease of $16,949,000 below the enacted level. This includes $19,036,000 for forest stewardship, $3,000,000 for community forest and open space conservation, and $23,956,000 for urban and community forestry.

**Forest Legacy.**—The bill provides $61,049,000 for the forest legacy program, a decrease of $1,298,000 below the enacted level. The Committee includes a rescission of $8,297,000 in Forest Legacy funds. This funding rescission is from cost savings of some projects and funds returned from failed or partially failed projects. The amount provided within this bill is available for the following distribution of funds and projects requested by the administration:
