Dear Mr. Chairman:

This letter outlines the U.S. Department of Agriculture's Forest Service estimate of anticipated wildland fire suppression costs for fiscal year (FY) 2018, as required in the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (Public Law 111-88), as a part of the Title V-FLAME Act of 2009.

This estimate is pursuant to Section 502(h)(3) of the Act, which requires the Secretary of Agriculture to submit an estimate of the anticipated wildfire suppression costs by the first week of May. The delay in the availability of certain data elements required for the development of the report presented challenges in preparing the report.

This forecast predicts, with 90 percent confidence, that fire suppression costs will be between \$1.091 billion and \$1.959 billion in FY 2018, with a median forecast of \$1.502 billion. These estimates are based on the best climate and weather data currently available as well as the most effective analytical tools and models used to estimate fire suppression costs. This forecast has been updated since March and reflects an increase in the median projection from \$1.475 billion to \$1.502 billion. The accuracy of the forecast increases over the course of the fiscal year as data inputs improve with the incorporation of year-to-date weather data and the most recent climate modeling outputs.

In compliance with Section 435 of Public Law 111-88, this information will be posted to <https://www.fs.fed.us/about-agency/budget-performance> after 45 days.

A similar letter and report is being sent to Ranking Member Betty McCollum.
