

The intent of this fillable pdf form is to provide field going personnel with data requirements used in the Wildland Fire Chemical Misapplication Reporting tool. The initial report can be completed by any field personnel, i.e. fire fighters, READs, and other Federal agency cooperators, HOWEVER SITE ASSESSMENTS MUST BE COMPLETED BY QUALIFIED PERSONNEL. Any data entered into this form, along with any other pertinent information (maps, photos, supplemental reports), will need to be transferred to the Wildland Fire Chemical Misapplication Reporting (WFCMR) tool at <http://www.fs.fed.us/fire/retardant/>.

## Fire Chemical Misapplication Report - Aquatic Site Assessment

incident number	misapplication longitude	latitude
incident name	field assessment date	time
agency	area affected in acres	and as % of avoidance area
area	description of avoidance area (check all that apply)	edge
unit		partial
subunit		center
stream order	clarity	} mapped dry intermittent stream
stream flow	color	
stream width	temp	species, critical habitat, or cultural resource in avoidance area
stream depth	pH	
	conductivity	streamsides vegetation burned?
distance to live water if applied within buffer zone or intermittent dry stream	burn severity	% canopy remaining % slope of avoidance area
post-application weather events	adverse impact?	comment below
		species specific terms and conditions or reasonable/prudent measures associated with species as described in the BO where this occurred?
take expected?	if yes, amount of habitat or count of individuals	species wide ranging in other forests?
take exceeds authorized amount?		other forests/regions notified?
salvage necessary?	if yes, describe measures taken and contacts below	contact date
		reinitiation of consultation needed?
		restriction of future retardant triggered?
FWS office	FWS staff	how were additional avoidance areas identified (GIS/Fire Staff/IC updates)
summary of communication (phone/email/meeting)		
NOAA office	NOAA staff	is follow-up monitoring required as a Term and Condition or RPM associated with the BO or recommend by resource advisor completing this evaluation?
summary of communication (phone/email/meeting)		
state or other agency notification		
		reporting
additional information		unit
		email
		phone

Maps, photos, or supplemental reports can be attached using the upload function within the online reporting tool at <http://www.fs.fed.us/fire/retardant/>.
