

US Forest Service Standard Trail Plans and Specifications

Step By Step Guide

V1.0 November 2014

Topics Covered In This Guide

This guide will help you develop a trail construction package using the new standard trail plans and specifications. Topics include:

- What are Plan Sheets and how to use them
- How to fill out Plan Sheets:
 - Defining the location and scope
 - Detailing specific trail construction features
- Description of the Standard Specifications and how to use them

What Are Plan Sheets And How To Use Them

- The plan sheets are typical trail drawings with tables you will edit to meet the design standards for your project
- Several sheets define the location and scope of your project.
- The remaining sheets provide details on specific trail construction features.

What Are Plan Sheets And How To Use Them

(Continued)

Sheets that define the **location and scope** of your trail project

- Title Sheet (STD_900-01)
- Vicinity Map (STD_900-02)
- General Notes (STD_900-03)
- Work List (STD_900-04)
- Line Diagram (STD_900-05)
or
- Plan and Profile (STD_900-07)
- Summary of Quantities (STD_906-01)

What Are Plan Sheets And How To Use Them (Continued)

Examples of sheets that detail **specific trail construction features**

- Typical Cross Section & Slope Finish (STD_911-01)
- Typical Retainers (STD_911-03)
- Existing Trail Restoration (STD_911-30-01)
- Clearing Limits–Trees and Logs (STD_912-01)
- Clearing Limits–Brushing (STD_912-02)
- Typical Surfacing Sections (STD_913-01)
- Rock Foundation (STD_918-10-01)
- Standard Culvert (STD_921-10-01)
- Drain Dip (STD_927-10-01)
- Drain Dip Details (STD_927-10-02)
- Reassurance Markers (STD_953-01)
- Seeding, Fertilizing and Mulching (STD_981-01)

What Are Plan Sheets And How To Use Them

(Continued)

- These plans supersede the 1996 Standard Drawings and Specifications for Construction and Maintenance of Trails
- Some plan sheets have tables that require you to provide values specific to the requirements of your project.
- The values you enter into the tables are determined by the Design Parameters appropriate for the Trail Management Objectives and Trail Class of your project.

Defining the Location and Scope

Title Sheet (STD_900-01)—This sheet is used to locate your project, display required signatures, and provide an index of sheets in your package.

Step 1: Insert a State map in the upper left corner block with the project location marked. Insert a map that has sufficient detail to accurately locate your project within the state.

Step 2: Insert a project location map in the center block with the project location marked. Insert a map that has sufficient detail (like a Forest Visitor Map) to accurately depict the location and scope of your project.

Step 3: Modify the top center title with the region name, forest name, district name, and project name.

Step 4: Modify the signature block to include the required forest and regional signatures of reviewers, recommenders, and approvers. The titles shown on the example are common. Your forest or region may have different requirements for approvals and signatures. Be sure to follow the signature requirements for your region and forest.

Step 5: Before submitting the final package, fill in the index with the sheet names and numbers included in your packet.

Step 6: Fill in the information block with the names of the designer, drafter, checker and project name.

The form is titled "TITLE SHEET (STD_900-01)" and is used for project location and scope definition. It includes the following sections:

- Top Left:** A map of the state with a project location marked (Callout 1).
- Top Center:** A title block with fields for "YOUR REGION", "YOUR FOREST NAME", "YOUR DISTRICT NAME", "TRAIL CONSTRUCTION PLANS FOR", and "YOUR PROJECT NAME" (Callout 3).
- Top Right:** An index table with columns for "SHEET", "INDEX", and "SHEET NO." (Callout 5).
- Bottom Left:** A signature block with fields for "REVIEWED BY:", "RECOMMENDED BY:", and "APPROVED BY:", each followed by a line for a signature and a line for a title (Callout 4).
- Bottom Center:** A map of the project site with a project location marked (Callout 2).
- Bottom Right:** A project information block with fields for "PROJECT NAME", "DESIGNER", "DRAFTER", "CHECKER", "DESIGN DATE", "DRAWING NO.", "SHEET", and "OF" (Callout 6).

Defining the Location and Scope

Vicinity Map (STD_900-02)—This sheet is used to locate the trail under construction or restoration and to label beginning and end points and important details and structures. The elements in this map are also used in on other sheets. Use a topographic map of sufficient scale to depict the nature of your project work.

Defining the Location and Scope

Vicinity Map (continued)

Step 7: Insert a map that accurately locates the vicinity, location, and scope of the trail project including:

- 1 Project trail numbers
- 2 Trail location
- 3 North arrow
- 4 Scale bar

Defining the Location and Scope

Vicinity Map (continued)

Step 8: Fill in the information block with the project name, forest name, district name.

 U.S. DEPARTMENT OF AGRICULTURE FOREST SERVICE STANDARD TRAIL PLAN	PROJECT NAME & LOCATION YOUR PROJECT NAME YOUR FOREST NAME YOUR DISTRICT NAME	DRAWING NAME VICINITY MAP		REVISION DATE XX/XX/XX	DRAWING NO. STD_900-02
		SECTION 900 - GENERAL	TYPICAL ID VCM	NO SCALE	SHEET 2 OF 19

Note:

This information block must be filled in for every subsequent sheet in your trail package.

Defining the Location and Scope

General Notes (STD_900-03)—This sheet provides definitions for the trail features used in standard trail packages.

The General Notes sheet provides typical identification numbers for trail features.

TYPICAL ID DEFINITIONS					
DRAWING NUMBER	TYP ID	DRAWING NAME	DRAWING NUMBER	TYP ID	DRAWING NAME
STD_900-01	TTL	TITLE_SHEET	STD_932-10-01	TPK	TURNPIKE
STD_900-02	VCM	VICINITY_MAP	STD_932-20-01	TPF	TURNPIKE_W/FOUNDATION
STD_900-03	GNT	GENERAL_NOTES	STD_933-10-01	SRB	STACKED_ROCK_BARRIER
STD_900-04	WKL	WORK_LIST	STD_933-20-01	MRB	MASONRY_ROCK_BARRIER
STD_900-05	LD1	LINE_DIAGRAM	STD-933-20-02	CMB	CONCRETE_MASONRY_UNIT_BARRIER
STD_900-06	LD2	LINE_DIAGRAM	STD_933-30-01	BRG	BARRIER_RAIL_ON_GRADE
STD_900-07	PP1	PLAN_PROFILE_10	STD_933-40-01	BRP	BARRIER_RAIL_ON_POST
STD_900-08	PP2	PLAN_PROFILE_20	STD_933-40-02	TBP	TIMBER BARRIER ON POST
STD_906-01	SOQ	SUMMARY_OF_QUANTITIES	STD_933-50-01	CRB	CURBS

The General Notes sheet also provides space to enter notes that help define specific trail construction considerations the project may require.

GENERAL NOTES
NOTES: 1. TRAIL LOCATION FOR NEW CONSTRUCTION AS STAKED IN THE FIELD. 2. CULVERT LOCATION AND SKEW AS STAKED IN THE FIELD. 3. DRAIN DIPS AS STAKED IN THE FIELD.

Defining the Location and Scope

Work List (STD_900-04)—This sheet breaks down the tasks to be completed by trail number and station. The sheet also provides detail about the corresponding specifications and information on quantity and payment.

[illegible]

Defining the Location and Scope

Work List (continued)

Step 9: Identify the trail number for the tasks to be performed.

These trail number designations correspond to those identified on the vicinity map.

In this example, the project identifies work on more than one trail in a complex of trails.

TRAIL NO.	BEGIN STATION	END STATION	TASK
102(C)	0+00	49+63	CONSTRUCTION OF NEW TRAIL
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	"	"	CONSTRUCT DRAIN DIP
	41+71		INSTALL 24 IN X 12 FT CULVERT
102(R)	49+63	58+13	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	51+75	53+20	CONSTRUCT ROCK FOUNDATION
205(R)	0+00	299+38	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION

Defining the Location and Scope

Work List (continued)

Step 10: Next, record the beginning and ending station for each task.

Once again, this information corresponds to information identified on the vicinity map.

TRAIL NO.	BEGIN STATION	END STATION	TASK
102(C)	0+00	49+63	CONSTRUCTION OF NEW TRAIL
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	"	"	CONSTRUCT DRAIN DIP
	41+71		INSTALL 24 IN X 12 FT CULVERT
102(R)	49+63	58+13	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	51+75	53+20	CONSTRUCT ROCK FOUNDATION
205(R)	0+00	299+38	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION

Defining the Location and Scope

Work List (continued)

Step 11: Provide a description of each task to be completed at each station.

TRAIL NO.	BEGIN STATION	END STATION	TASK
102(C)	0+00	49+63	CONSTRUCTION OF NEW TRAIL
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	"	"	CONSTRUCT DRAIN DIP
	41+71		INSTALL 24 IN X 12 FT CULVERT
102(R)	49+63	58+13	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION
	51+75	53+20	CONSTRUCT ROCK FOUNDATION
205(R)	0+00	299+38	EXISTING TRAIL RESTORATION
	"	"	CLEARING-TREES AND LOGS
	"	"	CLEARING-BRUSHING
	"	"	SEEDING
	"	"	TRAIL BLAZER INSTALLATION

Defining the Location and Scope

Work List (continued)

Step 12: A standard drawing sheet for each of the tasks is included in the final package. Record the drawing number for each task in the “Drawing No.” column.

Step 13: Referring to the General Notes sheet (900-03), enter the typical ID number that corresponds to the task to be performed at each station.

Step 14: Enter the specification number that corresponds to the task being performed at each station.

Step 15: Indicate if the task has a supplemental specification. Supplemental specifications modify the standard specifications and are unique to your project. These can also be special project specifications for work that does not modify a standard specification but is a feature unique to your project.

	12	13	14	15
TASK	DRAWING NO.	TYPICAL ID	SPECIFICATION NO.	SUPPLEMENTAL SPECIFICATION
CONSTRUCTION OF NEW TRAIL	STD_911-01	TSF-1	911.10	NA
CLEARING-TREES AND LOGS	STD_912-01	CLT-1	912.10	NA
CLEARING-BRUSHING	STD_912-02	CLB-1	912.20	NA
SEEDING	STD_981-01	SMF-1	981	NA
TRAIL BLAZER INSTALLATION	STD_953-01	RSM-1	953	NA
CONSTRUCT DRAIN DIP	STD_927-10-01	DD1-1	927.10	NA
INSTALL 24 IN X 12 FT CULVERT	STD_921-10-01	SCV-1	911.10	NA

Defining the Location and Scope

Work List (continued)

Step 16: Enter a pay item number for each task to be performed. Pay item numbers are located in the standard pay item list.

Step 17: Enter the unit of measure for each task. These numbers are found in the “Standard Specifications for Construction of Trails and Trail Bridges on Federal Projects.”

Step 18: The last column in this table contains the quantities (in the units of measure indicated) for each task to be performed.

	¹⁶ SUPPLEMENTAL SPECIFICATION	¹⁶ PAY ITEM	¹⁷ UNIT OF MEASURE	¹⁸ QUANTITY
	NA	91101	LF	4963
	NA	91203	LS	1
	NA	91212	LS	1
	NA	98102	LS	1
	NA	95301	EA	50
	NA	92701	EA	3
	NA	92101	LF	12

Defining the Location and Scope

Work List (continued)

Step 19: As with the other sheets in the package, fill in the information block with the project name, forest name, district name.

[illegible]

Defining the Location and Scope

Line Diagram (STD_900-05)—This sheet uses a line diagram which is a graphical representation of work to be done by location on a designated trail. The line diagram provides the basis for the summary of quantities sheet that follows.

Defining the Location and Scope

Line Diagram (continued)

Step 20: Label the trail number at the beginning of the line diagram.

Step 21: label the station number (0+00) at the beginning of the project.

Defining the Location and Scope

Line Diagram (continued)

Step 22: Label trail stationing at major ticks on the line diagram.

Defining the Location and Scope

Line Diagram (continued)

Step 23: Insert hash marks for specific trail construction activities such as drainage structures, trail structures, trail bridges, and so forth, and label each construction activity.

Defining the Location and Scope

Line Diagram (continued)

Step 24: Label the end of the project and the last station of the project on the line diagram.

Defining the Location and Scope

Summary of Quantities (STD_906-01)—This sheet provides a method for obtaining total quantities for the project and a breakdown of individual quantities by pay item.

[illegible]

Defining the Location and Scope

Summary of Quantities (continued)

Step 25: Insert the trail number in the space provided at the top of each column.

TRAIL NO.	102(C)	102(R)	
TRAIL LENGTH	0.94 (MI)	0.16 (MI)	5
METH. OF MEAS.	UNIT OF MEAS.	STA. 0+00 TO STA. 49+63	STA. 49+63 TO STA. 58+13

Step 26: Insert the length of the trail section for each column.

SUMMARY OF QUANTITIES

Defining the Location and Scope

Standard Trail Terms (STD_910-01)—This sheet provides a visualization of the standard features of trails. It is included in every trail plan package and ensures that common terms are used in subsequent plans and specifications.

Detailing Specific Trail Construction Features

- After filling in the required fields for the sheets that define the location and scope of the project, the remainder of the sheets in the package will focus on details that are relevant to your trail project.
- In this guide the discussion is focused on one sheet as a way of showing how the associated tables are modified to meet your needs.
- The tables are used to define specific details of how to construct a feature.

Detailing Specific Trail Construction Features

- Typical Cross Section and Slope Finish (STD_911-01)**—This sheet details the specifics of constructing a new trail. This task is also referenced in the Work List Sheet (STD_900-04). This sheet describes (in detail) the dimensions of the new trail to be constructed.

Detailing Specific Trail Construction Features

Typical Cross Section and Slope Finish (continued)

The main table for this sheet, “Typical Trail Tread and Shoulder Width,” is located at the top of the sheet.

Subsequent sheets that detail specific trail construction features use a similar layout. For example, the main table for Typical Retainers (STD_911-03) is located at the top of the sheet and labeled as such.

This “Typical Cross Section & Slope Finish” sheet has two other tables that provide further information to supplement the main table. These supplemental tables are also described in this guide.

Several other standard plan sheets also have one or more supplemental tables.

TYPICAL TRAIL TREAD AND SHOULDER WIDTH						
TYPICAL ID	SECTION TYPE	TREAD FINISH	TREAD WIDTH	SHOULDER WIDTH		COMMENTS
				UPHILL	DOWNHILL	
TSF-1	B	T1	24 IN	12 IN	12 IN	HIKING USE
TSF-2	A	T2	18 IN	6 IN	6 IN	MOUNTAIN BIKE USE
TSF-3	C	T2	48 IN	12 IN	12 IN	OHV USE

TYPICAL TRAIL CROSS SECTIONS

(A) FULL BENCH SECTION

(B) BALANCED SECTION

(C) FLAT SECTION

TYPICAL TRAIL TREAD AND SHOULDER WIDTH						
TYPICAL ID	SECTION TYPE	TREAD FINISH	TREAD WIDTH	SHOULDER WIDTH		COMMENTS
				UPHILL	DOWNHILL	
TSF-1	B	T1	24 IN	12 IN	12 IN	HIKING USE
TSF-2	A	T2	18 IN	6 IN	6 IN	MOUNTAIN BIKE USE
TSF-3	C	T2	48 IN	12 IN	12 IN	OHV USE

TREAD CROSS SLOPE				
TYPICAL ID	OUTSLOPE	INSLOPE	CROWNED SECTION	COMMENTS
TCS-1	3%	NA	NA	TYPICAL UNLESS OTHERWISE STAKED

Detailing Specific Trail Construction Features

Typical Cross Section and Slope Finish (continued)

Step 33: The typical ID numbers for the main table is formed by taking the three letters from the information block and adding a number to the end, sequentially.

In this case TSF-1, TSF-2, and TSF-3.

TYPICAL TRAIL TREAD AND SHOULDER WIDTH						
TYPICAL ID	SECTION TYPE	TREAD FINISH	TREAD WIDTH	SHOULDER WIDTH		COMMENTS
				UPHILL	DOWNHILL	
TSF-1	B	T1	24 IN	12 IN	12 IN	HIKING USE
TSF-2	A	T2	18 IN	6 IN	6 IN	MOUNTAIN BIKE USE
TSF-3	C	T2	48 IN	12 IN	12 IN	OHV USE

Detailing Specific Trail Construction Features

Typical Cross Section and Slope Finish (continued)

Step 34(continued):
Insert the typical ID numbers from the first part of step 1 into the main table.

TYPICAL TRAIL TREAD AND SHOULDER WIDTH						
TYPICAL ID	SECTION TYPE	TREAD FINISH	TREAD WIDTH	SHOULDER WIDTH		COMMENTS
				UPHILL	DOWNHILL	
TSF-1	B	T1	24 IN	12 IN	12 IN	HIKING USE
TSF-2	A	T2	18 IN	6 IN	6 IN	MOUNTAIN BIKE USE
TSF-3	C	T2	48 IN	12 IN	12 IN	OHV USE

TYPICAL TRAIL CROSS SECTIONS

(A) FULL BENCH SECTION

(B) BALANCED SECTION

(C) FLAT SECTION

TYPICAL TRAIL TREAD AND SHOULDER WIDTH

TYPICAL ID	SECTION TYPE	TREAD FINISH	TREAD WIDTH	SHOULDER WIDTH UPHILL	SHOULDER WIDTH DOWNHILL	COMMENTS

T2	3	3	3	
T3				
T4				
T5				
T6				

TRAILBED AND SLOPE FINISH

SLOPE FINISH
REMOVE ROOTS THAT PROTRUDE FROM THE TRAILBED WITH A BACKSLOPE GREATER THAN SHOWN IN THE SLOPE AND TRAILBED FINISH TABLE.

TRAILBED FINISH
REMOVE LOOSE ROCK ON THE TRAILBED WITH A BACKSLOPE GREATER THAN SHOWN IN THE SLOPE AND TRAILBED FINISH TABLE.
REMOVE OR REDUCE EMBEDDED ROCK THAT PROTRUDES MORE THAN THE DIMENSIONS SHOWN IN THE SLOPE AND TRAILBED FINISH TABLE.

NOTES:
1. SLASH CONSISTS OF LOGS, LIMBS, BRUSH, AND ROCKS PLACED RANDOMLY IN A WAY TO EARTH SEGMENT MOVEMENT.
2. LIMB ALL TREES AND SHRUBS AND TAMP SLASH INTO GROUND SO THAT BOX OF SLASH IS IN CONTACT WITH THE GROUND.

Detailing Specific Trail Construction Features

Completing The Other Specific Trail Construction Feature Sheets in the Trail Construction Package.

- All other plan sheets in the package are modified in a way similar to those described for the “Typical Cross-Section & Slope Finish” sheet (STD_911-01).
- Each of the other sheets have a main table that details the specifics of construction and supplemental tables and comments that assist the designer in filling out the specific information.

How to Use Standard Specifications In Your Trail Plan Package

- The specifications provide technical guidance for trail project designers.
- Include the entire specification document in the contract package, regardless of the specific plan sheets used in the project.
- Including the entire specification document ensures the requisite information is included regardless of what specific plan sheets are needed for a particular project.
- The specifications provide information that expands on information found on the plans.
- At times, a constructed trail feature may be determined by a standard specification without including an attendant plan sheet.
