¹ This is a list of the species or subspecies of California animals that have been classified as endangered, threatened, or proposed for listing by the U. S. Secretary of the Interior or the U. S. Secretary of Commerce (Federal list) as of February 1992. The official federal listing of endangered, threatened, and proposed species is published in the Federal Register, 50 CFR 17.11. E = Endangered, T = Threatened, P = Proposed as T or E.

² Candidate species are species currently being considered for listing as threatened or endangered by the U.S. Fish and Wildlife Service. Codes: 1 = category 1 candidate (taxa proposed for federal listing); 2 = category 2 candidate (taxa for which existing information indicated the species may warrant listing, but for which substantial biological information to support a proposed rule is lacking at this time). Refer to 50 CFR 17.11 for official lists. R = recommended for candidate status.

³ Forest Service sensitive species are species whose numbers are declining and are affected by management activities on Forest Service lands.
