

**UNITED STATES DEPARTMENT OF AGRICULTURE
FOREST SERVICE
OLYMPIC NATIONAL FOREST
OLYMPIA, WASHINGTON**

The Olympic National Forest may be applying the herbicides glyphosate, clopyralid, triclopyr, aminopyralid, sulfometuron methyl, or imazapyr to noxious weeds or other invasive plant species from April 21, 2025 – April 20, 2026. Please see the following spreadsheet and maps for a more detail about treatment areas. Each project is coded with a reference number on the map and corresponding spreadsheet to assist you in locating specific areas where treatments are proposed. Applications will be conducted as planned in the Final EIS-Olympic National Forest Site Specific Invasive Plant Treatment Project, which was finalized in 2008. Notices indicating that the formulation of the herbicide to be applied will be posted at entrances to the target road systems and/or individual sites. For questions about applications contact Nick Jarvis, Invasive Plant Program Coordinator for the Olympic National Forest at (360) 956-2261 or nicholas.jarvis@usda.gov.
