

The Investigation Team

Within hours of the incident an interagency team was being formed and the Occupational Safety and Health Administration was notified due to the fatalities of the federal workers. Jim Furnish, Deputy Chief for National Forest Systems, was designated investigation team leader. The investigation team first met in Twisp, WA on the evening of Wednesday, July 11.

The team investigated the fire and fatality site, and conducted interviews with people associated with the event. The team met daily in the morning and evening to discuss progress, review assignments, coordinate activities, review their findings, and document their work. The team adjourned July 23 with the bulk of the investigation and analysis done. Compilation and further refinement of the draft investigation report continued for the next few weeks, and the completed draft report was issued to the Management Review Board on August 23, 2001.

Subject: Thirtymile Fire Fatalities Investigation

To: Jim Furnish, Investigation Team Leader

The Accident Investigation Team, being led by you, including a core team, technical specialists, and other necessary support staff, is delegated the authority to conduct an investigation of the fatalities and injuries that occurred during the entrapment and shelter deployment on the Thirtymile Fire, Okenogon National Forest, WA.

The Team shall:

1. Organize, conduct, and control the accident investigation;
2. Coordinate information exchange among team members, local Law Enforcement, coroner, etc.;
3. Maintain liaison with affected units;
4. Approve requests and allocate funding for necessary resources;
5. Report preliminary findings or other facts, as they become known, to the Chief on an on-going basis;
6. Furnish to the Chief all reports as outlined in the Accident Investigation Guide (6700 Safety and Health April 2001-0167-2825-MTDC);
7. Through a thorough analysis of accident sequence, human factors, and environmental factors determine:
 - a. Direct causal factor(s) of fatalities;
 - b. Contributing factor(s) surrounding the accident;
8. Adhere to the Information Flow Chart (enclosed);
9. The primary contact for the Office of Communication is Joe Walsh.

A separate Management Review Team will be appointed to review the accident reports and to develop proposed corrective actions that should be implemented to eliminate future accidents of this nature.
