

Appendix A—Potential Historic USDA Forest Service Bridges

This appendix is a complete query of the USDA Forest Service Bridge and Major Culvert Inventory database for road bridges that may be eligible for listing on the National Register of Historic Places. Data is not currently available for trail bridges. This database is being continually updated and expanded. Additional bridges may exist that are not currently included in the database.

Section A-1 is a list of the State totals of all USDA Forest Service road bridges more than 45 years old.

Section A-2 is a listing, organized by USDA Forest Service region and State, of all USDA Forest Service road bridges more than 45 years old.

Section A-3 is a detailed listing by region and forest of all USDA Forest Service road bridges constructed prior to 1955. The listing includes road number, milepost, year built, length, material, and bridge type.

The BMC database is updated annually. Regional office engineering staff can compile varied, up-to-date queries as needed.

Section A-1 Number of Bridges Built Before 1955 in Each State.
