

Facility and Road Design Tips: FedBizOpps Provides Examples

Samantha Lidstrom, Project Assistant, and Charles Showers, Program Leader

Sometimes it's more efficient for Forest Service facility and road designers to use all or parts of existing designs, specifications, or contract language rather than starting from scratch. The FedBizOpps Web site (<http://www.fbo.gov>) makes it easy to locate designs and contract documents that can be used as examples.

The Federal Acquisition Regulation (FAR) requires all Federal agencies to post procurements over \$25,000 on FedBizOpps for public solicitation. New project managers and contractors may find it useful to review project plans and specifications on the FedBizOpps Web site to see how other units have handled similar Forest Service projects before beginning design work.

To find existing Forest Service road, building, and construction contracts (figure 1) go to the FedBizOpps Web site (<http://www.fbo.gov>):

1. Click the "Opportunities" tab.
2. Click the "Advanced Search" tab (figure 2).
3. Type "forest" in the keyword box. Under "Classification Code," scroll all the way down to select "Y-Construction of structures and facilities." Click "Search."

Scroll through the projects to find one that may be useful or further refine your search (figure 3).

Select the project to view the solicitation package. The left column has links to documents, drawings, and specifications included in the package.

Figure 1—Click on the "Opportunities" tab.

About the Authors

Samantha Lidstrom joined MTDC in July 2008 as a student temporary employee assisting in research and publications for the engineering program. Lidstrom is in her third year as a civil engineering student at Montana State University in Bozeman, MT.

Charles Showers, professional engineer, became engineering program leader at MTDC in the spring of 2002 after serving 2 years as operations program leader. Showers came to MTDC after 9 years as assistant forest engineer on the Payette National Forest. He began his Forest Service career on the Boise National Forest after completing 8 years as a construction project engineer with the Idaho Transportation Department.
